

DRUPAL TRANSLATION MANAGEMENT

IT'S CHILD'S PLAY

YOU COULD KEEP DOING IT THE OLD WAY...

- Manually export content to be translated in a format that translators can process
- Send the exported content to translators, by email
- Check the translations for quality when ready
- Copy- and paste translations back into Drupal, language by language
- Edit language pages to correct layout errors
- Publish translated pages

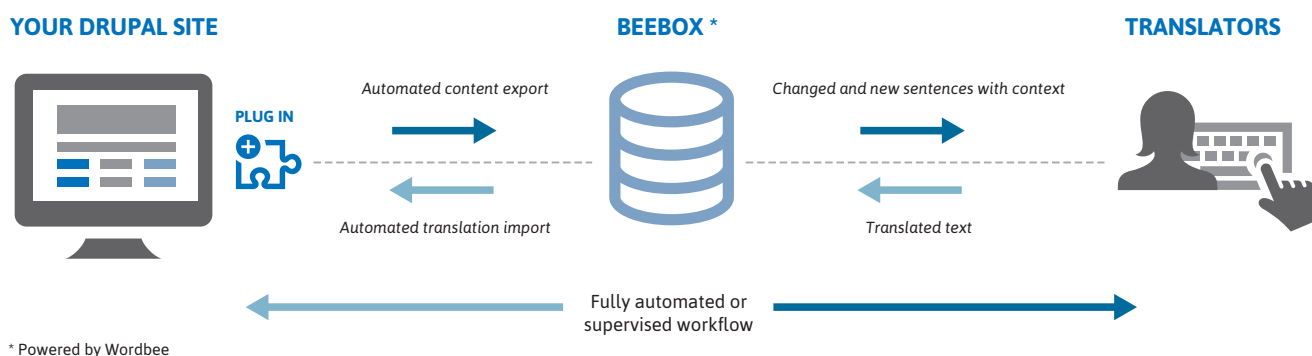

UNLESS YOU'D PREFER A BETTER, SHORTER WAY...

- Have content additions and updates tracked automatically
- Recycle existing translations
- Have new content to be translated sent automatically to the translators (yours or ours)
- Have translated content sent back automatically to Drupal, or under supervision

HOW DOES IT WORK?

- Install the Beebox plug-in at your Drupal site
- Content to be translated is selected automatically
- The memory remembers every translation ever done: only content for which there is no translation yet is filtered for export
- Selected content is sent automatically to translators, where appropriate based on a pre-defined workflow
- Translated content is automatically imported back into Drupal
- Before publication, you have the option to check and edit translations and, if needed, send them back to the translators
- Translations, when final, are automatically placed online

WHAT ARE THE BENEFITS?

- Automated translation management and in and out workflow in Drupal
- Substantial cost reduction
- Reduced time-to-publish
- Content automatically remains in sync in all languages
- European solution using EU best translation practices
- Choice between human, community and/or machine translation

CAN YOU TEST IT?

- You benefit from a 1-month trial period
- You install the Beebox plug-in in Drupal yourself or receive 50% discount on the plug-in installation cost
- You enjoy discounted translation rates if you use Connexion's translators during the trial
- You can view a demo at www.connexion.eu/drupal-beebox-demo
- Contact us if you would like a one-to-one presentation at your convenience
